use of the three former Tables of
use upon use, according to the rate of
6 in the hundred.

Or the first, if you would know to how
much one pound stock amounts (at In-
terest upon Interest) in any number of years
exceeding 31, seeke the number of years
in the first Columne towards your left hand,
under this word years, and there directly a-
gainst the same, you shall see the Sum desired.

Example.

Admit it be required to know how much
stock amounts at Interest upon Interest
in 31 years, look 21 under the word years,
and directly against the same you shall see
7 s. 11 d. 2 q. which is the summe desired.
But suppose the Question were to finde the
value of 10 l. stock in the same time, mul-
ty the same by 10, or adde the same 10
times together, which makes 33 l. 19 s. 7 d.
which is also the summe desired. And thus
you may work upon any summe desired in
any of the other Columns observing the man-
ner as is before, as the Propositions nomina-
ted in the head of each columne doe direct, and
show how much for compound Interest.

Now for simple Interest direct, I have
proposed the following Tables, at the rate of
per centum, whose use is thus. Seek the sum
desired, and under the same, you shall have
the Interest due for one year, or any time un-
der, namely from one moneth to 12 as is
there expressed which of it selfe, is so plain,
that it needs no further explanation.

Interest at 6 per Centum for 500 li. is for
each moneth as followeth.

Digits Eclipsed are 12. and 22. min. and there-
it will be total, as you may observe it in the
East.

the first Eclipse of the Sun is upon the 27 of Fe-
y to be seen in *Magellanica*, and the remote
thern parts of the Earth.

the other Eclipse of the Sun is upon the 22 day
August, to be see in *Nova Francia*, *Granada*, and in
places as border on *Virginea*.

this year, 1663. will happen a very notable Con-
juction of Saturn and Jupiter upon the 10 of Octo-
at 0 ho. 24. min. P. M. in 13 day, 32 min. 34 sec.
as it is most curiously calculated by Mr. *Vin. Wing.*
his Ephemeris of this year.

The use of this Table with a Caution.

Doe but observe in the fifth columnne of the Al-
ma-ack the houres and minutes of full-sea at London-
bridge over against each severall day of the moneth,
to or from which time there noted, adde or subtract
such houres and minutes as this Table above doth
appoint, and the totall of the one, or remainder of
the other shall be the time of full sea, at any of these
places abovesaid, salved the Anticipation or pro-
traction of time, which by the winds, Land-floods,
or Moons latitude, may be caused, which maybe an
houre, or sometimes more or lesse error, according to
their scite and quantity: a thing very remarkable of
Seamen when they passe by any bands, over any bar,
or haven, or such like.
